

5<sup>th</sup> International Conference on

# Rhinology and Otology

November  
16-17, 2018

Melbourne  
Australia

Theme:

*Briefing the medical  
revolution in the field of  
Rhinology and Otology*

Conference Series llc LTD welcomes you to attend the 5<sup>th</sup> International Conference on Rhinology and Otology, which is going to be held in Melbourne, Australia during November 16-17, 2018.

We cordially invite all the participants who are interested in sharing their knowledge and research in the arena of Rhinology and Otology.

Otolaryngology 2018 anticipates more than 200 participants around the globe with thought provoking Keynote lectures, Oral Presentations and Poster Presentations. The attending delegates include Editorial Board Members of related International Journals.

This is an excellent opportunity for the delegates from Universities and Institutes to interact with the world class Scientists.

The intending participants can confirm their participation by registering for the conference along with your colleagues. Avail the delegate early bird offer.

The main theme of the conference is "*Briefing the medical revolution in the field of Rhinology and Otology*".

Regards,  
Otolaryngology 2018  
Operating Committee

### November 16, 2018 Wednesday

Time	Session
08:30-09:30	Registrations
09:30-11:30	Keynote Forum
	Group Photo
11:30-11:45	Network & Refreshments Break*
11:45-13:00	Ear Disorders   Laryngology
13:00-13:45	Lunch Break**
13:45-16:00	Anesthesia and Pain Relief in ENT Surgery   Diseases of Ear
16:00-16:15	Network & Refreshments Break*
16:15-18:00	Pediatric Otolaryngology   Sinusitis

Day Concludes

### November 17, 2018 Thursday

Time	Session
08:30-09:30	Registrations
09:30-10:30	Keynote Forum
10:30-11:30	ENT Infectious Diseases   Facial Plastic and Reconstructive Surgery
11:30-11:45	Network & Refreshments Break*
11:45-13:00	Rhinitis   Head, Neck and Oral Oncology   Neurotology
13:00-13:45	Lunch Break**
13:45-16:00	Nasal Disorders   Implant Applications   Hearing Impairment and Deafness   Tinnitus
16:00-16:15	Network & Refreshments Break*
16:15-18:00	Poster Presentations

Day Concludes

Award Ceremony

Conferece Concludes

The field of Rhinology and Otolaryngology is growing rapidly and its development is making tremendous impacts in nursing. The importance and significance can be gauged by the fact that it has made huge advancements over the course of time and is continuing to influence various sectors.

### Otolaryngology 2018

- Opportunity to attend the presentations delivered by eminent scientists from all over the world
- Selected contributions will be published in following Conference Series Ilc LTD Journals
  - Otolaryngology: Open Access
  - Journal of Otolaryngology & Rhinology
  - Journal of Communication Disorders, Deaf Studies & Hearing Aids
  - Journal of Allergy & Therapy
- Participation in sessions on specific topics on which the conference is expected to achieve progress
- Global networking: In transferring and exchanging Ideas
- Share your excitement in promoting your skills in the field of designing
- Conference brings together Scientific Researchers, Business Entrepreneurs and Industry Developers

### International Journals

- 900 Open Access Journals
- 21 Day rapid review process
- 30000 Editorial team, 35000 Reviewers team
- 3.5 Million readers and high visibility
- More than 100000 
- Publication immediately after acceptance
- Quality and quick editorial, review processing

### Key features

- User friendly/feasible website translation of your paper to 50 world's leading languages
- Enhanced feature: Audio version of published paper
- Digital articles to share and explore
- Sharing option: Social networking enabled
- Authors, reviewers and editors are provided with scientific credits

### Conference Series llc LTD

#### Conferences

- 1000 Conferences all over the World every year
- Well organized scientific program
- Renowned speakers and scientists across the globe
- Poster presentations and world class exhibits
- Panel discussions and interactive sessions
- B2B meetings
- Perfect platform for Global Networking

#### Key features

- Presentation by renowned speakers from all over the world
- Poster presentations and world class exhibits
- Interactive Sessions
- Platform for global networking
- Connecting scientific community

Affectionately called "Brilliant Melbourne" all through the gold rush of the 1850s, the call keeps on being utilized today for Australia's second greatest city. Situated at the banks of the Yarra River, near the passageway to Port Phillip Bay, Melbourne is a present day city saturated with records. ECU settlement began in 1935; however the revelation of gold in 1851 saw a populace development with numerous miners settling in Melbourne. With immense riches created from the near to goldfields, magnificent structures have been assembled all through the town. A considerable lot of these structures in any case stand these days, and Melbourne is viewed as having additional cases of Victorian design than some other town in Australia. Melbourne is a "town for all seasons". From meandering the shrouded laneways and stupendous tree-covered lanes to the sections of land of city greenery enclosures and parklands, Melbourne is dynamic, trendy, and multicultural. Melbourne costs significantly in preparing, redirection, social scope, dynamic work, tourism and game, making it the parts most sensible city as showed by method for the market analyst insight unit. It is a noteworthy budgetary concentration inside the Asia-pacific region, and positions a couple of the principal 30 city zones on earth inside the global monetary focuses list. Suggested as Australia's "social capital", it's far the start of Australian impressionism, Australian clues football, and the Australian film and communicate gatherings, and Australian contemporary move, for instance, the Melbourne rearrange.

### Market Analysis:

Otolaryngology is a combined study of Otology and Rhinology or Ear, Nose and Throat. The Otolaryngology diseases can affect some of our most important senses, including hearing, smell and taste. As hearing and speech are important aspects of human development and this conference may offers a comprehensive otolaryngology study and the recent development and research in this area. "Cochlear Implants" & "Endoscopic sinus surgery" are the biggest recent development enabling deaf to gain sense of hearing and the surgery for Sino-nasal problems.

For more details please visit- <https://otolaryngology.conferenceseries.com/>

### Importance & Scope:

Otolaryngology 2018 highlights the theme "*Briefing the medical revolution in the field of Rhinology and Otology*". Otolaryngology-2018 is an event designed in a way to provide an exclusive platform for new researchers, scholars, physicians, ENT surgeons, students and educators to present and discuss the most recent innovations, trends, and concerns, practical challenges encountered and the solutions adopted in the concerned field. The three days of educational program will include keynote presentations, session speakers, and poster presenters on the latest in innovative techniques as well as papers in the areas of Rhinology, Otology, Laryngology, Head and Neck Surgery, Facial Plastics, Sleep - in adults & pediatrics and Oral Health.

The global ENT devices market is expected to reach USD 14,001 Million by 2020 from USD 9,595 Million in 2015, at a CAGR of 6.5% during the forecast period. Growth in ENT Devices market is mainly driven by the high prevalence of chronic sinusitis, rising geriatric population, favorable reimbursement scenario for ENT procedures in developed countries, rising adoption of minimally invasive ENT procedures, increasing presence of prominent players in the ENT devices

market, and technological advancements. In addition the growing adoption of surgical instruments and techniques that are minimally invasive and more accurate than the conventional methods is a key market trend that will drive the ENT devices market during the forecast period. However, changes in the reimbursement policy for Tracheoesophageal Voice Prosthesis (TEP) devices in the U.S., high cost of CO2 lasers, and high cost and lack of reimbursement for hearing aids are factors that are likely to restrict the growth of ENT Devices market.

### Market Research:

ENT devices are distinct equipment used for diagnosis, therapy, or surgery of any disorders related to the ear, nose, or throat, thereby helping to correct any problems related to hearing, smelling, snoring, or speaking, There are a wide range of ENT devices available in the market including endoscopes, hearing screening devices, powered surgical instruments, hearing aids, hearing implants, handheld surgical instruments, balloon sinus dilation devices, CO2 lasers, image-guided surgery systems, ear tubes, nasal and otological (ear) packing material, and voice prosthesis devices.

Chronic sinusitis is one of the top 10 medical conditions and contributes around USD 8.6 Billion of direct healthcare cost in the U.S. According to the Centers of Disease Control and Prevention (CDC), in the U.S., about 12.1% of the adult population or 28.5 Million people are suffering from chronic sinusitis, making it more prevailing than diabetes and asthma. This high prevalence of chronic sinusitis is driving the demand for ENT treatments such as endoscopic sinus surgeries, functional endoscopic sinus surgery (FESS), and balloon sinus dilation. Thus, growing prevalence of sinusitis is expected to propel the growth of ENT devices market.

ENT Devices Market report is a comprehensive study of current market trends in the market, industry growth drivers, and

restraints. These markets are analyzed at regional level to provide exhaustive market analysis for the years 2013, 2014, 2015 and forecast to 2020. Each market is comprehensively analyzed at a granular level by geography (North America, Europe, Asia and Rest of the World) to provide in depth on the global scenario.

market, and technological advancements. In addition the growing adoption of surgical instruments and techniques that are minimally invasive and more accurate than the conventional methods is a key market trend that will drive the ENT devices market during the forecast period. However, changes in the reimbursement policy for Tracheoesophageal Voice Prosthesis (TEP) devices in the U.S., high cost of CO2 lasers, and high cost and lack of reimbursement for hearing aids are factors that are likely to restrict the growth of ENT Devices market.

### Melbourne, Australia

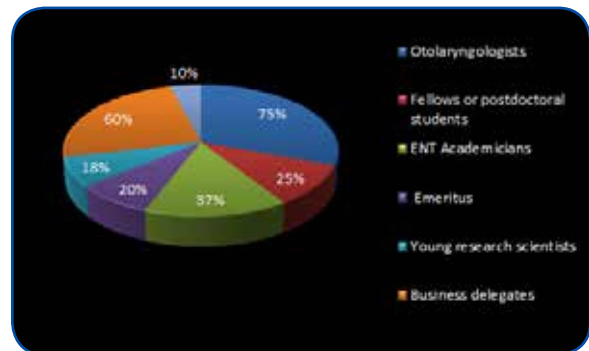

- Royal Victorian Eye and Ear Hospital
- Melbourne ENT Group
- The Royal Melbourne Hospital
- Berwick ENT
- The Alfred Hospital
- Stewart Lee ENT
- Havas ENT Clinic
- Adelaide & Hills ENT
- Perth ENT Centre

### Worldwide

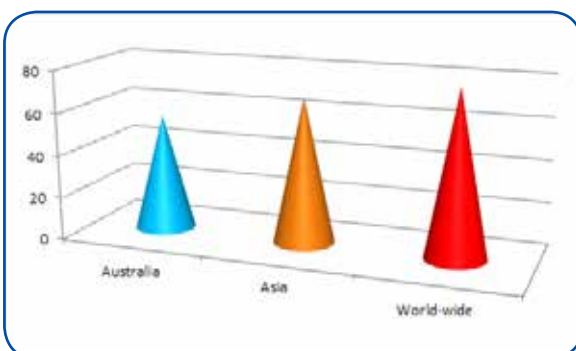

- Johns Hopkins Hospital
- Hospital of the University of Pennsylvania
- Fremantle Hospital
- Boston Children Hospitals
- Royal National Throat, Nose and GMC
- Tokyo Hospitals
- Duke Hearing Research Centre
- Canadian Specialist
- IFOS World

### Members associated with Otolaryngology research:

- Otolaryngologists
- Fellows or postdoctoral students
- ENT Academicians
- Emeritus
- Young research scientists
- Business delegates
- Physicians

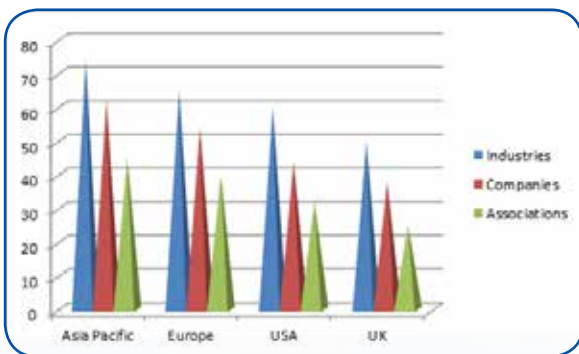

The above graph gives a review of the percentage of people associated with the field of Otolaryngology and found to have maximum of Otolaryngologists (75%) followed by Business Delegates(60%), ENT Academicians (37%), Post-Doctoral students (25%), Emeritus ( 20% ), Young Research Scientists (18%).

Associations, Companies & Industries related to Otolaryngology across the world:

The diagram depicts that the companies comprising specialization in the field of Otolaryngology are maximum in all the areas of the world and there is an arising increase in the industries and associations related to the field of rhinology and otology all over the world.

### Important Dates

Abstract submission opens: November 06, 2017

Registration opens: November 06, 2017

Early bird registration: June 15, 2018

On spot registration: November 16, 2018

### Venue

Melbourne, Australia
