With increase in prevalence of ear, nose and throat disorders in geriatric people the demand of ENT devices expected to drive the ENT devices industry rapidly over the upcoming years. Expanding levels of healthcare awareness among patients and healthcare professionals expected to increase the growth of the market over the forecast period. Minimally invasive surgical techniques involve the use of advanced and thin ENT devices in nasal, ear, and throat. The popularity of these types of surgeries is increasing because they are associated with minimal tissue damage, a quicker recovery, less irritation, and less scarring. ENT instruments available in the market are endoscopes, hearing aids and implants, handheld surgical devices, balloon dilation devices for sinus, CO2 lasers, image-guided surgery systems, ear tubes, and voice prosthesis devices. Presence of sophisticated healthcare infrastructure in the communities, favourable government initiatives led to growth and demand for ENT devices across the under developed countries due to the extensive research and development targeted at developing technologically advanced products.
