The Otolaryngology 2020 invites abstracts related to the new scientific research in all the fields of Otolaryngology, ear and throat disorders its related aspects. Registrants are invited to submit an abstract for consideration for oral and poster presentation. In general we encourage more specific to the current research fields representing innovation and recent technologies. Abstracts received will be reviewed by scientific committee from aspirants and categorized as speaker talks and poster presentations.

### ► Why to join ?

- Meet Experts & Influencer Face to Face
- Networking Opportunities
- Learning In a New Space
- New Technologies
- Greater Focus
- Have Energy of Like-Minded Individuals
- Investing on Yourself & finally have Fun!

### ► Entrepreneur conclave

The conclave intends to encourage entrepreneurs and provide opportunity to showcase and connect with global scientific community and industry.

### ► Round table Discussion

The right conference can be a game changer for your research and professional career. More importantly, the Round table conversation brings the experts networking and create the goldmine of opportunities.

### ► Workshop/ Interactive Sessions

Workshop sessions involve extensive interaction between presenters and participants around an idea or hands-on experience of a practice. These sessions may also take the form of a crafted panel, staged conversation, dialogue or debate – all involving substantial interaction with the audience.

### ► Develop Networking with.....

- Industry leaders
- Product scientists
- Development managers
- C-level executive
- Academicians

### ► Unique Services

- University Promotions
- Organizational collaboration
- Recruitment Drives
- Technical Trainings
- Technical Workshops at your Universities
- Career development sessions
- Post Conference Networking
- Scientific Success sessions
- Exhibitor Talk / Sponsor Talk
- Themed Paper Presentations
- Focused Discussions
- One-Day Registration
- Business meetings / one to one meetings
- Webinars
- Customised Conferences

## Poster Presentation Competition

A Poster session is a one-to-one informal discussion between presenters and their audience on a conference-related theme

### Aim :

- A poster is a graphically based approach to presenting research. In presenting your research with a poster, you should aim to use the poster as a means for generating active discussion of the research.
- Limit the text to about one-fourth of the poster space, and use "visuals" (graphs, photographs, schematics, maps, etc.) to tell your "story."

### Visuals :

- Posters should include a title, name and affiliation of the presenter(s) labelled with lettering at least 1" (2.54 cm or 72 point) high from the top of the poster space.
- Before you design your poster, consider how much text should appear in the display.
- Present numerical data in the form of graphs, rather than tables (graphs make trends in the data much more evident). If data must be presented in table-form, KEEP IT SIMPLE.
- Visuals should be simple and bold. Leave out or remove any unnecessary details.
- Make sure that any visual can "stand alone" (i. e., graph axes are properly labeled, maps have north arrows and distance scales, symbols are explained, etc.).
- Use color to enhance comprehension, not to decorate the poster. Neatly coloring black-line illustrations with color pencils is entirely acceptable.

### Eligibility :

- Candidates pursuing under graduation or Post graduation are eligible to participate in the Competition and win the International award.
- Age should not exceed 26 years

### Logos :

Remember to advertise your Institution! Always include the University logo. Also include your Research Centre logo. Use high quality images – poor quality, low resolution images will make your poster look poor quality too.

## YOUNG RESEARCHER AWARD

### Eligibility

- Young Investigators (e.g. Post-Graduate students, Post-doctoral fellows, Trainees, Junior faculty) are the focus of this event.
- The topic must fit into scientific sessions of the conference.
- Each individual participant is allowed to submit only one paper (10 slides, 15 minutes).
- None of the authors should have senior position or faculty position.
- Participants should be below the age of 30 years.
- All submissions must be in English.

### Benefits

- Showcase your research through oral presentations.
- Learn about career development and the latest research tools and technologies in your field.
- This forum will give pertinent and timely information to those who conduct research and those who use and benefit from research.
- Develop a foundation for collaboration among young researchers.
- The forum will provide an opportunity for collegial interaction with other young investigators and established senior investigators across the globe.
- Interact and share ideas with both peers and mentors.

## Explore Singapore

Singapore, an island city-state off southern Malaysia, is a global financial center with a tropical climate and multicultural population. Its colonial core centers on the Padang, a cricket field since the 1830s and now flanked by grand buildings such as City Hall, with its 18 Corinthian columns. In Singapore's circa-1820 Chinatown stands the red-and-gold Buddha Tooth Relic Temple, said to house one of Buddha's teeth.
